

CORE organic II

CORE Organic is short for Coordination of European Transnational Research in Organic Food and Farming Systems, an ERA-NET designed to increase scientific cooperation between and across national research activities.

CORE Organic has existed since 2003 and has expanded to 21 countries, 26 partners and 2 transnational observers. CORE Organic II is currently funded by the European Commission in FP7.

Main focus: Initiating transnational research projects and sharing the results within all countries

Examples of project leaflets

Examples of project dissemination pages

CORE Organic I (2004-2007) funded 8 pilot projects and the results of these can be found at www.coreorganic.org/research

CORE Organic II has until now funded 11 research projects running from Autumn 2011- Autumn 2014. The projects are presented at www.coreorganic2.org under research projects

CORE Organic II is currently evaluating the full proposals of the second call with the themes: market and plant breeding

CORE Organic II has launched a real common pot call with 6 countries. Theme: management of phosphorus and use of secondary fertilizers

Future plans: to continue and expand the network

Governing Board

Coordinator Niels Halberg, International Centre for Research in Organic Food Systems, Denmark.
